DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Group I (claims 1-3) is directed towards an image forming apparatus comprising, amongst other features, a setting section for setting a mode in which half of the paper is an image, with the other half being a commenting section, a document top side section, a document direction judging section, and a layout determination section. Group II (claim 4) is directed towards an image forming apparatus for dividing a page into pairs of adjacent areas for printing images or being left as a blank area. The species are independent or distinct because the claimed inventions are distinct in how they divide a page up (i.e. half a page per are for group I, but group II has pairs of two adjacent areas) for printing and the techniques used to arrive at the result.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
